

Limit uncertainty with precision craftsmanship and accurate administration of dental anesthetics

N-Tralig® Intraligamentary Syringe

The N-Tralig Intraligamentary syringe is designed for the delivery of anesthetic into the periodontal ligament. Intraligamentary injections provide controlled administration of anesthesia to one tooth at a time.¹ An optional 30° angled barrel hub adapter is available to help facilitate injections into more difficult to reach areas of the oral cavity.

- N-Tralig syringe is made of German stainless steel
- Precise delivery of 0.2cc of anesthetic per ratchet¹
- Positive ratchet action helps to protect the anesthetic cartridge against breakage
