

Prophy Peace of Mind!

Mobility. Choice. Control.

new! AeroPro®

The new standard in prophys for these challenging times

During this 'New Normal,' AeroPro's light-weight, ergonomic cordless and pedal-less handpiece gives you the mobility you want, the choice of prophy angles you like, and the control you need. While it's not possible to completely eliminate aerosols, AeroPro's constant prophy cup speeds eliminate the unintentional variations common with rheostats that can result in splatter. AeroPro's low-speed option provides effective cleaning while helping to reduce the amount of aerosols generated from over-spinning.

Additionally, AeroPro's innovative design helps reduce hand fatigue by allowing you to rotate the angle 360° for improved intraoral access and comfort. Its quick-touch button enables fingertip control for easy switching between low and high speeds. Its quiet yet powerful motor maintains a consistent speed during polishing – no extra pressure required. ChargeSMART™ Battery Technology gives you long-lasting power to get through the workday.

And yes, AeroPro® is CDC-compliant with a convenient infection prevention protocol. Best of all, your patients get a great polish.
