

Unique Knitted Microfibers with Superior Absorbency!

Aluminum chloride
(AlCl₃ · 6H₂O)

Knit-Pak™+ Impregnated Knitted Cord

Knit-Pak™+ is an impregnated retraction cord engineered from unique knitted microfibers to provide unsurpassed performance. The innovative fibers are distinguished by providing high durability and outstanding retention properties.

These attributes create a retraction cord with superior absorbency and a fray-resistant, pliable structure for efficient procedures and great patient outcomes.

- Aluminum chloride impregnated cord (AlCl₃ · 6H₂O)
- Easily packs into sulcus
- Cuts clean – will not entangle in burs
- Lint and particle-free
- 100 inches (254cm) per container

A ceramic cutting blade inside the cap automatically cuts the cord upon closing firmly.

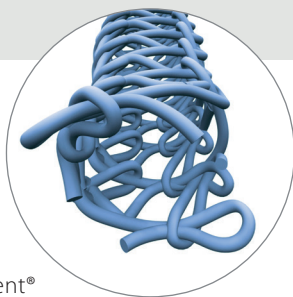

The cord piece is held by the cap until removed, preventing it from dropping. Protects cord piece and container from cross-contamination.

Knit-Pak™

Knitted Retraction Cord

Knit-Pak™ is ideal to use in combination with Hemodent® hemostatic agent or Traxodent® for tissue displacement and hemostasis prior to taking an impression.

- Carries greater quantities of hemostatic solution than twisted and braided cord
- Easily packs into sulcus
- Will not fray and resists popping out of the sulcus
- Cuts clean – will not entangle in burs
- 100% cotton – color coded for easy identification
- 100 in (254cm) per container

Premier® Retraction Caps

Cotton caps work with Traxodent to quicken retraction and hemostasis.

- Easily guides Traxodent into the sulcus when patient closes
- Compression assists and quickens hemostasis
- Anatomic form allows easy placement

9048251	Size 1 Small (120)
9048253	Size 3 Medium (120)
9048255	Size 5 Large (60)
9048260	Assorted - (30) #5, (15) #1, (15) #3

Hemodent®

Buffered Aluminum Chloride Hemostatic Solution

- Effectively stops minor gingival bleeding
- Epinephrine-free to avoid cardiac reactions
- Stable and offers a long shelf-life
